Reasons for an Allowance

COMES NOW the Patent Office, by Patent Examiner, and offers at least a reason for the Application, to wit: that the Prior Art neither anticipates, nor in any reasonable combination, suggests a method of fabricating an electrical circuit including the steps of depositing a layer of a 1st conductive material onto a surface of a flexible substrate, wherein the layer of the 1st conductive material is substantially transparent and wherein at least a portion of the substrate is translucent or transparent, depositing a layer of a 2nd conductive material onto the layer of a 1st conductive material, selectively a portion of the layer of the 2nd conductive material and selectively etching a portion of the layer of the 1st conductive material. The prior art also neither anticipates or in any reasonable combination suggests a method of fabricating an electrical circuit including the steps of depositing a layer of a 1st conductive layer of a 1st surface of a substrate, depositing a layer of a 2nd conductive material onto a 2nd surface of the substrate, selectively etching a portion of the layer of the 1st conductive material, selectively etching a portion of the layer of the 2nd conductive material, perforating the substrate at a predetermined location and electrically coupling the layer of the 1st material with the layer of the 2nd conductive material via the perforation.
